Nature's magic — the intoxicating magic of the seasons and the Sun's light, the deep, wild magic of the Earth — is the most powerful magic we can tap into. This workshop is an opportunity to harvest the power of the Summer Solstice to shift and change stagnant energy in your life, and draw your dreams into reality.

Magic — real magic, not the wand-waving, tortured-Latin magic of Hogwarts — lets us consciously work with the energies of creation to facilitate personal growth, build the life we dream of for ourselves and our loved ones, and change the world we live in.

Though there is no Latin to memorize, magic is a skill that must be developed through study and practice. In the workshop, we'll learn two techniques of magic — the construction of a talisman, an object that acts as a magical battery to keep your intention charged and focused, and working with nature spirits as allies. In the ritual, we'll work together at deep levels to empower our talismans, so they will carry our dreams and fuel our personal magic as we move into the waning half of the year.

Here's what you'll get:

- ◆ A charged, empowered talisman you've created to help manifest a specific outcome
- ◆ A meditation you can use regularly to contact and work with Nature Spirits
- ◆ A whole afternoon to consciously focus on, assess, and shift the direction of your life
- ◆ A ritual that will put you in tune with Nature's magic and the shifting seasons
- ◆ Prior to the workshop you'll receive a seasonal meditation, and a couple of simple spells you can do in advance if you wish

This will all happen at the beautiful [Crystal Visions](#), where the lovingly-tended garden draws nature spirits of all kinds, and the space is tuned to encourage meditation, magic, and spiritual work. **The magic begins when you register, and your reservation must be made in advance.**
